Clinoptilolite Zeolite (Liquid Phase)

Carbonair's clinoptilolite is a safe, natural zeolite with unique sieving and cation exchange properties. This adsorbent media is ideal for the removal of ammonium and lead at low concentration levels.

Typical Applications

Groundwater and wastewater treatment

Typical Contaminants

Ammonium and lead

Typical Physical Properties*

Mesh Size	6x14
Bulk density	45-47 lbs/ft ³
Hardness	3.5-4.0 Mohs
Pore volume	< 52 %
Clinoptilolite content	75-85 %
Cation exchange capacity	0.8-1.2 meq/gm

* Please consult with Carbonair for your specific application.
